

FOR IMMEDIATE RELEASE:

4-Wire Complementary Output Inductive Proximity Sensors

October 4, 2017 - Buffalo Grove, IL - CARLO GAVAZZI is proud to announce the launch of the new **4-Wire Complementary Output Inductive Proximity Sensors** with the expansion of the **ICB Series**.

For people who cannot afford to have a line down due to the lack of an available part, having the correct components for replacement, means significant reduction of machine downtime. Carlo Gavazzi has developed the **ICB Series with Complementary Output** with the objective of adding product flexibility. They provide both a Normally Open and Normally Closed Output in the same package for easy replacement, without compromising performance. Based upon the popular **ICB Series** platform, the 4-wire DC sensors are offered in:

- Short or long barrel
- Flush or non-flush mounting
- NPN or PNP type
- M12 plug for quick disconnect or 2 meter pre-wired cable
- Standard or extended sensing distances (reaching up to 22mm)

The **4-Wire Complementary Output Inductive Proximity Sensors** feature:

- Integrated diagnostics LED
- IP67 rating to protect against water and humidity penetration
- Built-in microcontroller for accurate and repeatable operation
- Conformance to global standards such as UL 508 and IEC 60947-5-2

These 4-wire sensors are ideal for position and presence sensing for various types of applications found in the Material Handling, Machine Tool and Packaging industries.

The **4-Wire Complementary Output Inductive Proximity Sensors** are available from Carlo Gavazzi's North American network of sales offices and distributors, or at www.GavazziOnline.com.
