Application notes

Application Note : May 2016

Market involved : Machine tools

Product : CONBXXNF-XXP

Customer : -

Subject : Resistance to aggressive agents in machine tools

CUSTOMER ISSUE :

Machine tools are usually working in environments where oil, coolants and grease are used.

This is the reason why the connectors should be able to resist to such agents.

OUR SOLUTION :

The CONB connectors offer a 100% PUR cable jacket that is more reliable and provide higher resistance to agents like oils, coolants and grease than standard PVC or mix PUR/PVC connectors.

BENEFITS :

- Resistant to oil, coolants and grease
- High durability and flexibility
