

Application notes

Application Note : May 2016

Market involved : Production line

Product : CONBXXNF-XXP

Customer : -

Subject : High flexibility and abrasion resistance in assembly and production line

CUSTOMER ISSUE :

In most assembly and production line; there are many moving parts, such as CNC machines, conveyors, robotic arms and drag chains.

The connectors must be highly flexible and resistant to abrasion.

OUR SOLUTION :

The CONB connectors offer a 100% PUR cable jacket that is highly flexible, resistant to abrasion and can be used in a wide range of applications.

BENEFITS :

- High flexibility
- Abrasion resistance
- Resistant to mechanical stress
