

Application notes

Application Note : May 2016

Market involved : Food & Beverage

Product : PD30ETxx

Customer : System integrators, installers

Subject : Detecting presence of meat or meat trays on a conveyor system

CUSTOMER ISSUE :

The food industry requires a high standard of hygiene and cleanliness in equipment that has to withstand daily wash-down at high temperature and high-pressure, also the use of harsh detergents.

OUR SOLUTION :

The PD30ET sensors work perfectly even in the harshest environments.

The high-quality stainless steel housing guarantees maximum mechanical resistance and aggressive cleaning agents pose no problem, avoiding costly machine downtime.

BENEFITS :

- The sensor lasts longer in the application with less maintenance.
