

## Application notes

**Application Note : December 2014**

**Market involved : Agriculture**

**Product : ICB12, ICB18 series**

**Customer : -**

**Subject : Robust and fully customizable solution in agricultural applications**

### CUSTOMER ISSUE :

The installation of electronic components in agricultural applications is critical, due to harsh conditions such as oily and dusty environments.

### OUR SOLUTION :

The ICB12 and ICB18 sensors have a new rear part designed to further strengthen the mechanical grip between the housing and the cable.

All sensors are rated to IP67 and high performance eco-friendly potting material is used.

### BENEFITS :

- Improved sealing to prevent humidity and water-seeping problems.
- A complete range of sensors which offers tailored solutions with customizable options.
