

FOR IMMEDIATE RELEASE:

Comprehensive Range of Conductive Liquid Level Controls

January 19, 2011 - Buffalo Grove, IL - Carlo Gavazzi is pleased to launch a new generation of multi-function conductive liquid level controllers, with new and advanced features. The new **CLD/P Series** brings these new features together with a simpler than ever to use interface.

The multi-function controllers allow easy monitoring of two to four level points, with simple selection of functions, including filling, emptying, and new functions such as a tank-well option, which allows a single device to control levels in an above ground tank and underground well, and prevent either from running dry. A master-slave option allows up to seven controllers to be directly connected to each other. A new single-point controller is added to the family, which includes a time delay function to allow for filling or emptying of a tank with a single level point.

All functions and adjustments of the **CLD/P Series** are made via rotary switches and potentiometers on the face of the unit - no dip switches or push buttons are used. LEDs on the controllers give clear indication of the power and relay output states. The controllers are in compact 17.5 or 35mm wide housings, with DIN-rail mount or eleven pin plug connection.

The **CLD/P Series** are UL, cRUus and CSA approved, and designed to be in compliance with all relevant European and North American standards, and carry the CE mark. These are your assurances of a high quality, tested, and safe product. They are available from Carlo Gavazzi's North American network of sales offices / distributors or www.GavazziOnline.com
