

FOR IMMEDIATE RELEASE:

Compact Universal-Voltage Motor Thermistor Relay

November 29, 2017 - Buffalo Grove, IL - CARLO GAVAZZI proudly announces the launch of our latest motor thermistor relay in a compact, DIN-rail mount housing. The **DTA04** features universal input voltage, giving it flexibility to be installed in a variety of control panels. This is a DIN rail mounted thermistor relay whose main purpose is to protect electric motors from overheating, ensuring continuous production and preventing machine downtime.

Simplicity, versatility, and reliability are crucial for most users as they select monitoring controls to protect motors and equipment. The **DTA04** meets these criteria with key features that include an operational mode that can be configured as Auto or Manual reset, giving the user the ability to select the option that best suits their requirements. The universal input voltage and multiple NEMA B300 relay outputs also provide users with the choices, which they usually require.

The **DTA04** gives Carlo Gavazzi more thermistor relay housing options than any other manufacturer, to meet more motor protection applications. The **DTA04** conforms to global standards such as UL 508, CSA C22.2 and EN 60255-6, and can be used globally in all applications/markets where motors are used and overloads are frequent and may cause motor damage, such as pumping stations, water treatment, conveyors, material handling, HVAC, chillers, and others.

The features of the **DTA04 Motor Thermistor Relay** include:

- Compact 22.5mm wide DIN rail mount housing
- Universal power supply from 24 to 240V AC/DC
- 2 Normally Open relay outputs NEMA B300 8A @ 250 VAC
- Multi-color alarm LED indicates alarm trigger
- Auto or manual reset configurable
- Fast reaction time of < 500ms

The **DTA04** is available from Carlo Gavazzi's North American network of sales offices and distributors, or at www.GavazziOnline.com.
