

Timers Multifunction Type FMB01

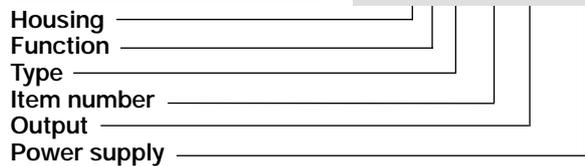

- Time range 0.05 s to 300 h
- Knob selection of time range
- Knob adjustable time setting
- Knob selection of operating mode (6 functions):
 - A - delay on operate
 - B - symmetrical recycler OFF first
 - B2 - symmetrical recycler ON first
 - C - signal ON/OFF delay
 - D - delay on release
 - E - interval
- Manual start
- Repeatability: $\pm 0.3\%$ on full scale
- Output: 5 A DPDT relay
- 48 x 48 mm housing for front panel mounting
- 11 pin sockets
- LED indication for relay status and power supply ON

Product Description

Multifunction timer with 6 functions and selectable time range from 0.05 seconds to 300 hours. 48 x 48 mm for front panel mounting and on 11-pin socket.

Come ordinare

FMB 01 D M24

Type Selection

Mounting	Output	Plug
Front or socket	DPDT	11-pin

Supply: 100 to 240 VAC
FMB01DM24

Time Specifications

Time ranges
Selectable by front knobs

Time unit	sec	min	hrs	10h
Full scale setting	1.2	0.05 to 1.2		0.5 to 12
	3	0.125 to 3		1.25 to 3
	12	0.5 to 12		5 to 120
	30	1.25 to 30		12.5 to 300

Timing accuracy	
Repeat accuracy	$\pm 0.3\%$ on full scale ($\pm 0.3\% \pm 10$ ms max in a range of 1.2 s)
Setting error	$\pm 5\%$ on full scale ± 50 ms
Voltage drift	$\pm 0.5\%$ on full scale ($\pm 0.5\% \pm 10$ ms max in a range of 1.2 s)
Temperature drift	$\pm 2\%$ on full scale ($\pm 2\% \pm 10$ ms in a range of 1.2 s)

Reset	
Power supply interruption	>100 ms
Pulse width	> 50 ms

General Specifications

Output	DPDT relay
Output insulation resistance	> 100 M Ω (at 500VDC)
Contact Ratings (AgCdO ₁₂) Resistive loads AC 1	μ 5 A @ 250 VAC / 30 VDC
Mechanical life	$\geq 1 \times 10^7$ operations
Electrical life	$\geq 1 \times 10^5$ operations (5 A at 250 VAC, $\cos \phi = 1$, 1.8×10^3 operations/h)
Operating frequency	< 1800 operations/h

Supply Specifications

Power Supply Rated operational voltage through terminals: (FMB01DM24) 2, 10	Overvoltage cat II (IEC 60947-1) 100 to 240 VAC +10%-15% 50 / 60 Hz
Power consumption Rated operational power	10 VA @ 240 VAC (50 Hz)

General Specifications

Indication for Power supply On	LED, green (flashing when timing)
Output relays ON	LED, red
Environment Degree of protection	IP 40 (front panel)
Operating temperature	-10 to +55 °C (14 to 131 °F)
R.H.	35 to 85% RH
Housing dimesions	48 x 48 mm
Weight	Approx. 95 g
CE marking	Yes
EMC Immunity	Electromagnetic Compatibility According to EN 61000-6-1
Emission	According to EN 61000-6-3

Function and Time Setting

Upper right knob:

Setting of function

- A** - delay on operate
- B** - symmetrical recycler (OFF first)
- B2** - simmetrical recycler (On first)
- C** - signal ON/OFF delay
- D** - delay on release
- E** - interval

Lower right knob:

Time unit selector

- sec** (seconds)
- min** (minuts)
- hrs** (hours)
- 10h** (10 hours)

Lower left knob:

Time range selector
1.2, 3, 12 and 30

Centre knob:

Time setting on relative scale

Mode of Operation

Function A

Delay on operate

The time period begins as soon as the trigger contact is closed. At the end of the set delay time the relay operates and doesn't release until the power supply is disconnected.

The trigger contact is invalid while the timer is in operation.

Function B

Symmetrical recycler (OFF first)

The time period begins as soon as the input contact is closed. The relay is OFF during the set delay period, after this time it operates for the same time period. This sequence continues with equal OFF- and ON- time periods until power supply is interrupted.

Function B2

Symmetrical recycler (ON first)

The relay operates and the time period begins as soon as the input contact is closed. After the set delay period the relay releases for the same time period. This sequence continues with equal ON- and OFF- time periods until power supply is interrupted.

Function C

Signal ON/OFF

The relay operates as soon as the trigger contact is closed. If the trigger contact is released before the set time period, the relay releases after the set delay period; if the trigger contact is released after the set time period, a new time period begins as soon as the input

contact is opened. If the trigger contact is closed before the end of the delay time, the device resets and a new period starts.

Function D

Delay on release

The relay operates as soon as the trigger contact is closed. The time period begins when the trigger contact is opened. The relay releases at the end of the set delay time or when the power supply is disconnected. The relay operates again when the input contact is closed again. If it is opened before the end of the delay time the relay keeps ON, a new time period begins as soon as the contact is closed again.

Function E

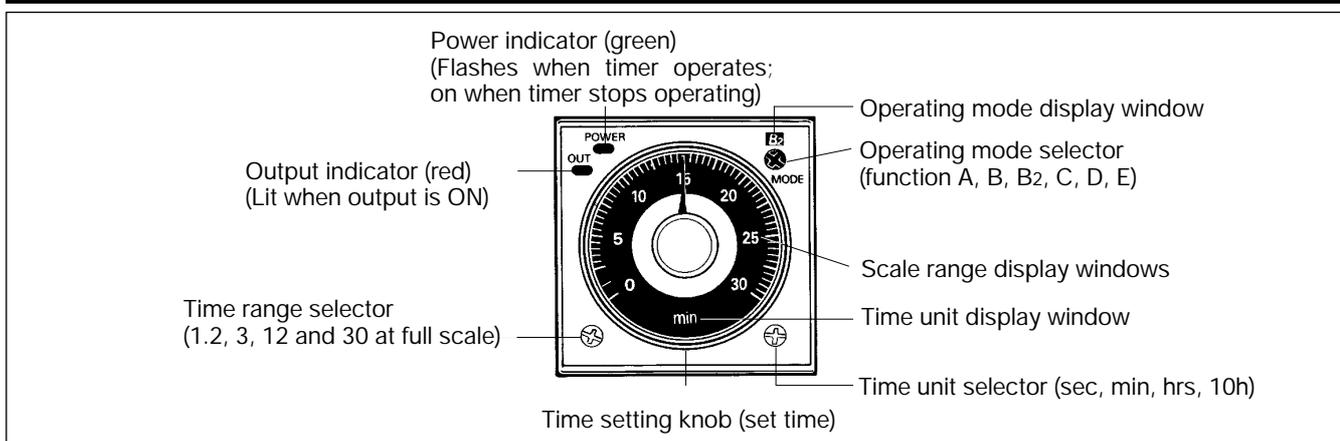

Inteval

The relay operates and the time period begins as soon as the trigger contact is closed. The relay releases at the end of this period or when the power supply is disconnected. The relay operates again when the trigger contact is closed again. If the trigger contact is closed before the end of the delay time, the device resets and a new time period starts.

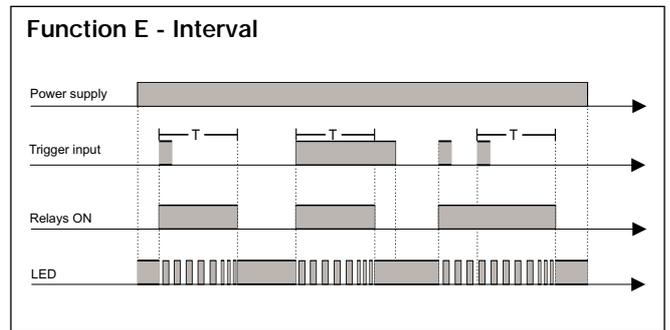

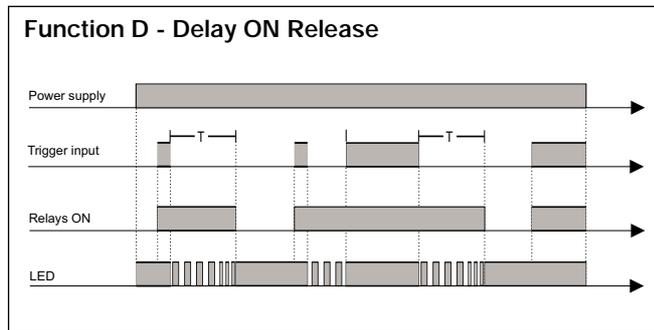

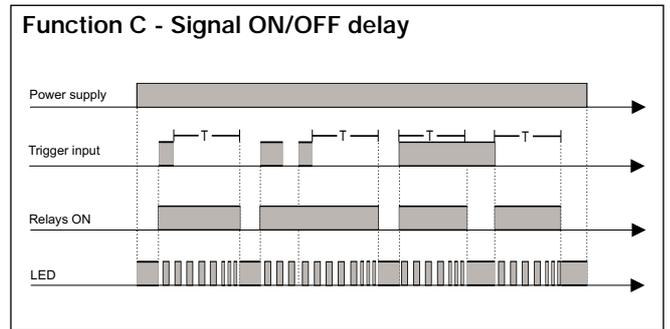

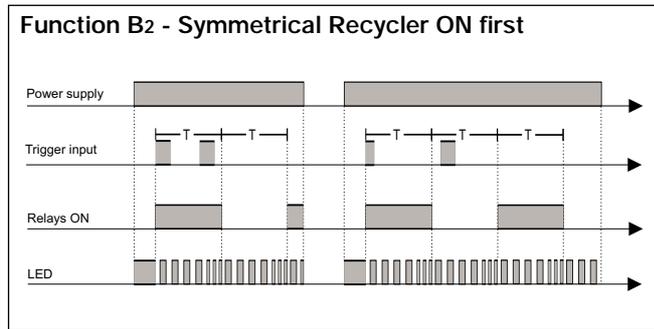

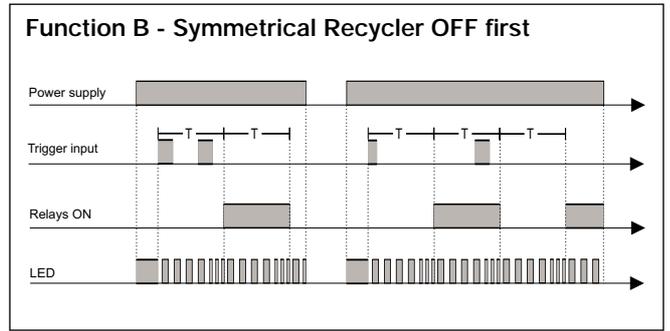

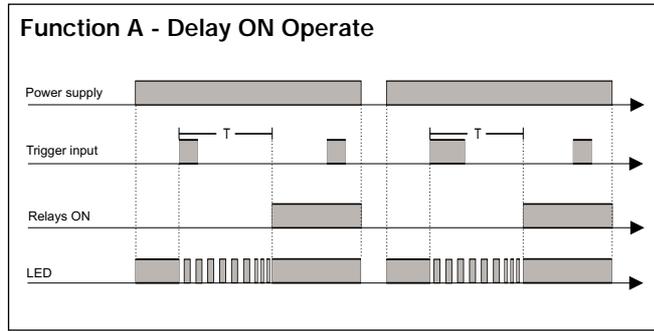

Additional Load

It's possible to connect an additional load (i.e. a relay) between pins 5 and 10, driven by the trigger contact without damaging the device (see wiring diagram).
