

Calgary University

- **Type of building:**
School

- **Parking bays:**
1300

- **Country:**
Canada

- **City:**
Calgary, Alberta

- **Year:**
2011

• Technical Specifications:

The parking at Calgary University is equipped with an integrated revenue and guidance system. Each of the 1300 spaces is equipped with a G62203301724 Dupline ultrasonic sensor with built-in multi-colour indication.

The payment control system, located in the central server, receives a pre-payment in the ticket-machine for a certain time period, shortly after the arrival of the car in its space. The available spaces are indicated in green and, when a car arrives, the indicator switches OFF.

If the "period of grace" between parking and payment, or the pre-paid time, is exceeded, the indicator will change to red to indicate a parking violation. From the server it is also possible to reserve spaces; these are indicated with an amber light.

• Benefits:

When a parking-time violation occurs, this is immediately indicated - both in the PC user interface and through the local LED indicators. There is no need for the parking operator to manually check the tickets on the cars.

- Increased revenue for carpark owners, as new arrivals will not benefit from the remaining pre-paid parking time of the previous car.
- Increased turn-around of spaces, driver convenience and energy savings.
- Added advantage of reserving spaces.
