Photoelectrics Retro-reflective, Industrial Door Market Type PD86, Polarized, Relay Output, Mute Input

Product Description

The PD86 is a powerfull polarized retro reflective sensor. The sensor is designed to meet the harsh requirements in industrial door and gate environments. With a sensing distance of 12 m, the sensor is useful in applications where dust and weather conditions will influence on the sensing distance. The sensor is made of a strong glass reinforced PC housing.

With the mute input, the sensor fulfills European and North American regulations for industrial doors.

• Range: 12 m @ ER 4 (15 m @ ER100)

- Modulated, visible light, polarized
- Make or break switching function, selectable by DIP-switch
- Active high or active low mute function (switch selectable)
- LED-indication for target detected and power
- Multi supply voltage: 12-24 VDC/VAC, 50/60 Hz
- 86 x 44 x 39 mm reinforced PC/ABS-housing, IP 66
 SPST relay output
- High EMC and ambient light immunity
- CE, UL325 and UL508 approved
