

HDMS – Innovation that excites!

HDMS brings to the market a new category of motor starters for single phase motors of CSCR type. It is targeted to OEMs and System Integrators in the heat pump, water treatment and refrigeration sectors who want to avoid high maintenance costs due to frequent start

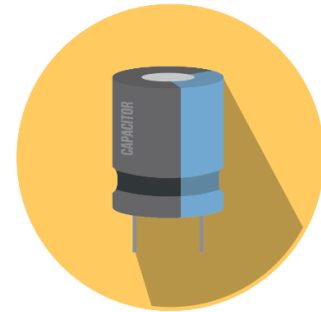

Self-learning

- Automatically adapts to load requirements
- No user adjustments
- Active all the time

Tool free

- Saves precious time during installation
- No tools required
- Push-in technology

No start capacitor

- Longer lifetime
- Reliable on weak grids
- Robust against voltage fluctuations
