## CONB SERIES M12 AND M8 CORDSETS

IP67 SENSOR CORDSETS FEATURE

EXCEPTIONAL PRICE-PERFORMANCE RATIO

### PRODUCT DESCRIPTION

The M12 and M8 CONB Series cordsets are available with a straight and 90 degree angle connector for three, four or five conductor sensors. They come with two, five, ten or fifteen meter standard PVC jackets. For more harsh environments, they are also available with 100% PUR jackets. PUR is more flexible and durable than PVC, it is also tear-resistant, abrasion-resistant, and provides improved resistance to coolants, oil, and grease.

For more detailed specifications on the CONB Series, please see the link to the data sheets below.
