

PRODUCT OF THE WEEK

CC SERIES CONTACTORS

CC SERIES POWER CONTACTORS

FOR HEAVY DUTY LOADS UP TO 900A

PRODUCT DESCRIPTION

Carlo Gavazzi's CC Series not only offers a complete range of Contactors, but also a full line of electronic and thermal overloads for circuit and device protection, manual motor starters for basic motor control, and auxiliary contact units for increased functionality. The optional interlocks, and wire kits allow easy conversion to reversing contactors to simplify control of 3-phase motors. UL Listing, conformance to IEC standards, CSA and CE certification, and RoHS compliance, certify these Contactors for use in domestic and international markets. From 9 to 900 Amps, the CC series covers all your application needs.

For more detailed specifications on the CC Series, please see the link to the data sheet and endurance ratings below, as well as our data sheets on accessories, electronic overloads, and thermal overloads.
