UDM35 SERIES DIGITAL PANEL METER

MODULAR PANEL METER WITH 3.5 DIGIT DISPLAY

PRODUCT DESCRIPTION

The UDM35 series is a hi-tech modular panel meter with a 3 1/2 digit display, developed to meet your most advanced application needs. The microprocessor-based digital panel meter takes a variety of inputs, including for current, voltage, temperature, resistance, rate, frequency, speed and period measurements. Measuring ranges and functions are easily programmable from the key-pad. A variety of output options include single and dual relays, analog voltage and current, and RS485 and RS232 communication. The front panel contains a gasket which gives the UDM35 protection degree ratings of IP67, NEMA12, and NEMA4X.

For more detailed specifications on the UDM35 Series, please see the link to the data sheet:

KEY FEATURES

- MODULAR DESIGN - SELECT ONLY FEATURES THAT ARE REQUIRED
- SEVERAL MULTI-VOLTAGE OPTIONS TO CHOOSE FROM
- SIMPLE PROGRAMMING VIA FRONT PANEL BUTTONS
- PASSWORD PROTECTION ENABLED
- MULTIPLE SIGNAL, PULSE, AND TEMPERATURE INPUT OPTIONS
- RS485, RS232, RELAY, AND ANALOG OUTPUT OPTIONS
- 1/8 DIN HOUSING, 48 X 96 X 105MM

The UDM35 is ideal for measuring and displaying key variables in various industries including:

MATERIAL HANDLING

PACKAGING AND WRAPPING

PANEL BUILDERS

WATER AND WASTE WATER

PLASTICS AND RUBBER

HVAC AND REFRIGERATION

FOOD PROCESSING

ELECTRIC UTILITIES

Controls
